

This Is An Important Message From Our Clinic:

To ensure student safety and health, the Polk County School Board has established a policy for the administration of medications during school hours, this is for both prescription and over the counter medications. The following choices are offered:

\*The parent or an adult (designated in writing) can come to school and give the child the medication

\*You can obtain a copy of the Authorization for Medication/Treatment Form for your medical provider to complete, and then an adult should transport the medication to the school to sign it in with the clinic nurse.

\*Discuss with your medical provider if the medication can be given outside school hours.

School Personnel are not allowed to give any medication to students unless they have received a properly completed Authorization Form, a new form is required with each new school year and if the medication or dosage is changed.

We appreciate your compliance in this matter and look forward to continued care for our students, in our school clinic.
